Subject: Dryden diving team sent to JAF

Date: 02/27/2009

Don,

I would like to relay my observations of the Dive teams you sent to James A Fitzpatrick for repair of our A Traveling Water Screen 36TS-2A the week of 2/15/2009. The Dive team was actively involved in all aspects of repair, from initial investigation for extent of condition, evaluation of repair options, selection of repair option, implementation of repair plan, the successful repair itself and further cleaning required on redundant Traveling water screens after those repairs were complete.

My field observation was when we needed manpower to remove buckets your crew jumped into the work. They manually carried damaged chain links up the stair case, assisted with removal of the buckets from the chain, helped with change out bottles for the torch, manually moved 350 lb buckets. They went beyond what they were contracted for.

The Dryden Diving team is a professional, dedicated, hard working group and welcome anytime at JAF.

Thank you,
Scott McCall
JAF Mechanical Superintendent
