RE: Rehabilitation of two storage tanks (2MG each)
Pipe Modifications

Dear Don:

I just wanted to take this opportunity to express my gratitude to Dryden Diving for your part on the above referenced project. Your crew worked well with the Authority and Hydro-Stop teams to enable an expeditious completion to the piping modifications. I was pleased with the complete dry isolation of our tanks from our distribution system. By isolating the tanks, the Authority was able to "save" a total of four million gallons of potable water. The schedule for this project was tight and I appreciated your flexibility in complying with our needs.

If any future projects consist of similar circumstances, I will not hesitate to contact you. Thanks again!

Sincerely,

Joseph W. Sutor
Engineering Project Manager
