RE: Dive Team Members Associated with Unit 8 and Unit 11 Work

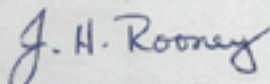

Dear Mr. Dryden:

I would like to thank all the members of your diving team that supported the station in the emergency repairs to Conowingo Units 8 and 11 in the fall of 2004. The extraordinary efforts made by the team during a difficult situation were greatly appreciated.

As you know, the men were required to work long hours, on short notice, under extremely difficult conditions. In spite of all the hardships, the men performed their duties professionally and efficiently. Their input was invaluable during the resolution of many of the problems we were dealing with, and above all, safety was a priority during the entire process.

Please express my sincere thanks, along with the gratitude of all the personnel at Exelon, to yourself and the following Dive Team Members: Lou Ericsson, J.C. Spangler, Robert Brice, Mike Myers, Mike LaRoche, Will Rodriguez, Jeff Brown, Tom Connely, and Jeffery Warner.

Sincerely

James H. Rooney
General Manager
